

IQAC 2017-18

Procedures and policies for maintaining and utilizing physical, academic and support facilities:

All infrastructure pertaining to physical, academic and support facilities at LSR are regularly maintained to ensure that they are of maximum benefit to the students as well as teaching and non-teaching staff. A Building Committee has been constituted in college to ensure maintenance work is conducted in a timely fashion. Infrastructure is regularly checked and monitored and repairs are made to any aspect of the infrastructure that is found malfunctioning. It is also ensured that the available infrastructure is accessible to the members of college. The college ensures timely maintenance and upkeep of ramps for wheel chair access, hand rails and elevators. Wash rooms for differently-abled students are available both in the college and the Residence Hall. Swavalamban is a resource centre in college for differently-abled students, particularly for those with visual disabilities. It provides access to assistive technology and equipment including the Everest. The center is maintained in collaboration with KPMG.

Most lectures take place in classrooms with projectors, mics and speakers. This is to ensure usage of new audio-visual pedagogical techniques during the teaching process. A new computer laboratory has been set up to be used by departments of Mathematics, Commerce, Statistics and BA Program. This has been done keeping in mind the increasing student strength of college. The college also has access to a 24x7 Wi-Fi facility as provided by the University of Delhi. Students can use their own laptops in the college and may also use computers available in the library. The campus also offers facilities such as cafeteria, medical room etc. The functioning of the cafe is looked into by the Cafe committee constituted by faculty members of college. Any complaints regarding cafe functioning are taken seriously and rectified as soon as possible.

The daily assembly, talks by guest speakers, inter-college competitions, and important functions including the annual College day, Independence Day and Teachers Day are held in the college auditorium. The auditorium can seat about 700 people and has a very advanced light and sound system. It is equipped with a large stage (40 × 60 ft), two green rooms, comfortable seating, carpeting, wall paneling for acoustic effects, air-conditioners, wash-rooms, locker and podium. The sound system includes a 12-channel mixer and a studio master. The light room can operate almost 100 lights at the same time with the help of its electronic dimmer. There are also 16mm and digital video projectors, for screening films. All of these facilities are regularly checked and maintained by the college staff. Staff are also available to assist students and teachers in case there is some issues with the mics and projectors.

Both the library and administration section of LSR have undergone computerization. The library is fully digitised and is open even after class hours. It has computer terminals with internet facility and reading cubicles. A regular update on new additions is provided by the library. A library committee works regularly to oversee the functioning of the library and keep it updated with the latest books needed by students
