BEAUTY AS COERCION- A TALK BY DR. TRIPTI BASSI

On 8th April 2021, the Women's Development Cell, LSR organised an interactive session with Dr. Tripti Bassi, a Senior Assistant Professor in the Department of Elementary Education, LSR, on the theme Beauty as Coercion. In her session, Dr. Bassi exposed the various myths existing in our society when it comes to the idea of female beauty. 130+ participants attended the session and walked away with a better understanding of the social, economic and political implications of beauty standards in our society and ways to break away from the patriarchal discourse on beauty, to recognise the innate beauty of every individual and to create new discourses based on choice and individuality, which are not influenced by the male gaze but by personal fulfilment.

TURNCOAT DEBATE

Women's Development Cell, Lady Shri Ram College for Women, in collaboration with Women's Studies Centre (WSC), Jesus and Mary College organised an inline Turncoat Debate on the motion, "This house believes that Feminism is incompatible with Capitalism".

The debate saw a turnout of over seventy attendees and had ten participants speaking passionately about the aforementioned motion. All participants gave powerful speeches and the top performers were recognised by the judges.

The event was a great platform for students from both colleges to come together and discuss and deliberate upon relevant issues, put forth their views and learn from each other.

A TURNCOAT DEBATE

THIS HOUSE BELIEVES THAT FEMINISM IS INCOMPATIBLE WITH CAPITALISM

Feminist theorists today are increasingly returning to the insight that 'capitalist society' must constitute the critical frame for understanding contemporary forms of women's subordination and feminist struggles to overcome it. This renewed interest in the connections between feminism and capitalism raises a host of difficult questions concerning the relations between capitalism and gender asymmetries, and the path to transformation.
