

Mathematics Department Student Feedback Report

Strengths of the Department:

Following a student-centric approach of pedagogy, the faculty of the department has been regular and punctual. Despite the pandemic-induced barriers, the classes in the online mode had been interactive, engaging and discussion-based. Helping students to stay on track in their academics in unprecedented times by conducting regular assessments and providing required feedback was given special emphasis to. Teachers have also been guiding students on courses in higher studies and future avenues to venture in, after their graduation. Another crucial step in this direction has been the availability of adequate research opportunities in the department. The teachers have remained supportive and approachable to students, thus facilitating their journey towards academic excellence.

Providing a progressive aura for students to grow and learn holistically, the college also aids them in engaging with social issues of utmost pertinence. The college societies have been playing an integral role in ushering the students out of their comfort zones and encouraging them to unveil their true caliber by providing them with participative and advancing spaces to engage with.

Challenges faced:

Though pedagogy took a great leap forward in employing tech-savvy solutions to the COVID-generated obstacles, some more explorative methods like usage of audio-visual material remained a challenge. Another challenging aspect in the online mode was the irregular accessibility to the online library of the college. The college and department fraternity is working towards tackling these challenges and innovating solutions to these hindrances.
